

project task force

SR 2 Highway Improvement Project

The California Department of Transportation is forming a **project task force** made up of community members to assist in the effective delivery of the upcoming State Route 2 Highway Improvement Project.

This advisory committee will not have oversight of the project. Caltrans and its contractor will make all project decisions. The task force priority will be safety first. Following safety, we will look at the collective needs of the community. Individual concerns will be considered after that.

Function of the task force

- Disseminate information to the community about the project
- Provide input relative to community concerns
 - Progress reports
 - Traffic management plans
 - Coordinate project operation with businesses
- Help coordinate community events with construction
- Address any other unforeseen issues that may arise

If interested in participating on this task force, please email Joy Sepulveda, Construction Liaison, at joy.sepulveda@dot.ca.gov or call and leave a message at 909.383.6291.
